Federal Communication Commission

Re: Petition 04-160 HR 4026

I strongly and respectfully urge the Federal Communication Commission (FCC) to reject the National Association of Broadcasters (NAB) Petition 04-106. I support XM's ability to provide the kind of programming that I need and enjoy. I spend a lot of time traveling in my business. XM provides me with a lot of information with the traffic, weather and news channels, also there is a greater variety, and the signal quality is superior.

Satellite Radio is a paid service; as such it should not have any more limits than currently exist. The programming is unlike anything available on commercial AM/FM., especially the convenience of signal retention over vast distances. I pay for these services and it should not be up to the National Association of Broadcasters to choose my programming or radio for me.

Again I strongly urge the Federal Communication Commission to reject the National Association of Broadcasters petition 04-160 (HR4026).

Thank you for your time and consideration.

Sincerely,

Sean G. Roberts
